

## Energy efficiency

I am still little  
But I can say  
We need electricity  
Even when we play.  
Even my computer  
And the games I play  
Without electricity to work  
There is no way.  
I save electricity,  
It does a lot of good  
When the sun goes down  
To turn on the lights we should.  
The dark is terrible,  
There` isn`t much in it we can do  
So save while you can  
For everybody, especially for you.  
Be efficient and smart  
For everyone`s future and joy  
So take an active pact –  
Save, build – never destroy.
