Save the electricity!

Turn off all the bulbs

That you can now,

So children in the future

Will have enough light.

If everyone took better care

There wouldn`t be any blockouts.

Our electricity bills would be lower

If we turned off the appliances

More often.

We should save electricity

Wherever we can,

Start with using wood again.

Join in the mission

And leave your mark,

Help us prevent

In the future ever being

In the dark.
